

Don't Unintentionally Draw Skunks to Your Backyard

You may be inviting skunks to your yard if you put cat food outside or toss old food onto a trash pile.

We received information that there have been numerous skunks in the town proper of Sherry.

Please take precautions to place cat food or compost piles where skunks can't get to it.

Skunks can figure out cat doors, can easily climb steps and can dig under fences.

Skunks are second only to bats as potential rabies carriers.
